## GARDENING

### FRUIT SEED GARDEN

You can use the seeds from the fruit your family eats to start your own fruit garden!

#### WHAT YOU'LL NEED:

Seeds from fruit  
[apples, oranges, grapefruit, lemons or limes]  
Dish of water  
Plant pot  
Soil

**STEP 1:** Once you have 8-10 fruit seeds, fill a small dish with water and soak the seeds for a day or two.

**STEP 2:** Fill a plant pot with soil.

**STEP 3:** Bury the seeds about a quarter of an inch deep in the soil, and water them.

**STEP 4:** Over the next few weeks, watch your seeds carefully. Keep the plant pot in a sunny place, and water the seeds every couple of days. Soon you'll see plants pop through the soil.

As the plants get bigger, you may want to separate them into bigger pots or plant them outdoors, if the weather is warm enough.
